

Anthony Robbins, author of *Awaken the Giant Within*, tells us "As a speaker, I'm often onstage for 12 hours or more a day. Three-and-a-half years ago, Dr. Herb Ross found that the electromagnetic fields (EMF) emitted by my wireless headset were creating a physical weakness in my body. When I began utilizing the QLink, I noticed an immediate recovery in my muscle strength and a counteracting of the negative effects from the headset's low frequency waves. I have certainly benefited from the QLink."

Today's world requires strengthened mental, emotional and physical resilience. If you live in a metropolitan area, your body is immersed in EMF — the electromagnetic fields from electronic devices and wireless communications. This environmental stressor is rapidly escalating in intensity, and the more you are exposed to it, the more your energy is drained. EMF from cell phones, computers, air travel, and household appliances are parasitic energies that severely deplete your own energy states.

Some scientists estimate that you are exposed daily to one hundred million times more EMF radiation than your grandparents were. Research shows that these fields have a disruptive effect on the energy levels of your body. You have to expend energy to counter the high frequencies of EMF. This can magnify your body's "fight or flight" responses, compound your adrenal loads from other stressors, and significantly reduce your ability to function effectively. This can also impair your body's natural ability to heal.

EMF exposures may cause a number of adverse effects including weakness and fatigue, increased anxiety, decreased mental function, headaches, dizziness and impaired vision. The long-term adverse health effects of EMF are still unclear, although a number of studies show serious health consequences. Emotional imbalances and mental fatigue can also result from EMF exposures.

EMF is increasing exponentially around the world, and is now a 24/7 phenomenon. Adverse health effects may result from cumulative exposures. Perhaps the biggest danger to EMF exposure lies not in what we know, but in what we don't know.

Andrew Weil, M.D. author of *Spontaneous Healing* and *8 Weeks to Optimum Health*, says that "electromagnetic pollution [produced by EMF] may be the most significant form of pollution human activity has produced in this century, all the more dangerous because it is invisible and insensible."

The QLinks have been tested and shown that they strengthen your resilience and resistance to the effects of EMF. Research suggests that the QLinks enhance your body's natural immunities to all sources of electromagnetic interference. The QLinks are the premier products for strengthening you against both direct and ambient sources of EMF.

The Clarus team lives in large cities, and we are avid users of computers and cell phones. We are fully aware of the life-style risks from our new electronic ecosystem, and want to develop the best products to aid everyone's ability to healthfully evolve with today's rapidly changing, technological world.
