

The ClearWaves

The ClearWaves are the only electronic clocks in the world that do not drain your energy while you sleep or work. Engineered with SRT™, the ClearWaves powerfully neutralize EMF effects in the environment.

They should replace all bedroom, home and office electronic clocks. When used in the home or workplace, customers report more restorative sleep and increased mental, emotional and physical resilience to the effects of stress.

The ClearWaves are engineered in 3 strength levels, depending on the size of the spaces that need EMF clearing. Use the ClearWaves when you want rejuvenating sleep at night — and when you want to be alert and fully charged during the day.

QLink Ally

Once you try this portable powerhouse, you'll know why we call it the QLink Ally.

As small as a cell phone, the QLink Ally is a true friend to the road warrior. It boosts your functional capacity to work and travel in EMF rich environments. It is especially useful for people who frequently drive or fly, and who want to increase their resistance to exposure to a wide variety of stressors.

The innovative Sympathetic Resonance Technology™ in the QLink Ally boosts your energy, keeping it strong and smooth – so you can experience optimal performance and well-being. Take it with you on the road so you'll be alert, resilient, and less fatigued.
